WSG Drinking Water Filtration Systems

WSG-240

WSG-240 U.V.

Great tasting water is as close as the spigot we install at your kitchen sink. No more lifting of heavy bottles! \$ave money! You can have similar quality water for only pennies a gallon.

Water Specialties Group's filter systems provide an assortment of point-of-use filtration methods designed to fit the varying needs of individual water supplies. We take pride in providing simple, easy-to-service, filter systems that are tailored to individual budgets and effective in treating specific problems in drinking water. The optional ultraviolet sterilization chamber is an ideal, chemical-free way of treating bacteria, viruses, and other microorganisms.

Model	To Remove These Contaminants								
	Visible Particulate	10 Micron Particulate	Sub Micron Particulate	Taste & Odor	Chlorine	Pesticides & Chemicals	Lead & Heavy Metals	Cysts & Spores	Bacteria & Viruses
WSG-240	G	A	B	G	A	G	C	A	
WSG-240 UV	G	A	B	G	A	G	C	A	A

Warning: Systems without ultraviolet disinfection should only be used on microbiologically safe water. Activated carbon filters are not designed to kill or remove bacteria or viruses.

REMOVAL RATINGS:

G=Greatly Effective

A=>99.97% Removal @ 3000 gallons

B=>95% Removal @ 3000 gallons

C=>90% Removal @ 3000 gallons
